

I-94 Calhoun County Design Build – Southwest Region

Question & Answers #1

Question 1: The Statement of Qualifications lists - "Design - Environmental - Waterways" as a prequalification requirement in Section 2.4 - Prequalifications. This is not an available MDOT prequalification, please advise.

Answer: An addendum will be issued to remove this requirement.

Question 2: The RID documents contain no geotechnical information. Will this provided?

Answer: Geotechnical information is still being gathered. We will provide a Geotechnical Report in draft form at this time located in the RID Surveys folder. The final geotechnical reports will be included in the Final RFP.

Question 3: The statement of qualifications states that it is MDOT's desire to "increase the I-94 design speed to 75mph in 4R reconstruction areas" – Could MDOT please define what area of the project will be 4R reconstruction?

Answer: An addendum will be issued clarifying the 4R reconstruction areas.

Question 4: At this time, our team has not identified the Subcontractor to cover a subclassification. Assuming this subcontractor will be a Major Participant, how should this be identified in the Major Participant section in Attachment Form E – Submitter Introduction?

Answer: An addendum will be issued to address this question. Refer to RFQ Section 3.3.1 and Attachment E.
